To Fight AIDS, Tuberculosis and Malaria

Global Fund eligibility list for 2012 funding channels

Important Notice:

• Note that eligibility should be distinguished from compliance with TFM requirements. An applicant identified as eligible on this list may not meet the additional requirements for funding under TFM. Potential applicants should first read the information note on the Transitional Funding Mechanism (http://www.theglobalfund.org/en/application/infonotes/) to determine whether they comply with TFM requirements.

• This Eligibility List has been compiled by the Global Fund Secretariat to inform applicants on the eligibility of their countries to apply for new funding, according to the Global Fund Board approved Eligibility, Counterpart Financing and Prioritization policy ("the Policy") and the Board decision GF/B25/DP16.
• Note that this list does not apply to grant renewals.
• Finally, the guidance reflected in this list is for information purposes only and is based on the Secretariat's best estimates at the time of publication. Applicants are advised to check the information provided in this Eligibility List against the eligibility requirements as set out in the Policy (http://www.theglobalfund.org/documents/board/23/BM23_14PICPSCJEligibilityAttachment1_Policy_en/) and in the Board decision GF/B25/DP16 (http://www.theglobalfund.org/documents/board/25/BM25_DecisionPoints_Report_en/). In the event of any inconsistency between this Eligibility List and the requirements as set out in the Policy and Board decision, the Policy and Board decision shall prevail.

The Global Fund Eligibility list details the eligibility of individual countries for 2012 funding channels. It is based on four main criteria that determine country eligibility: income level (all applicants); disease burden (for Upper-Middle Income countries only); list of ODA recipients of the OECD-DAC (for Upper-Middle Income countries only); and history of recent funding (all applicants).

This list establishes whether each country is eligible to submit proposals for each component (HIV and AIDS, tuberculosis and malaria) as a single-country applicant in the General Funding Pool and/or the Targeted Funding Pool. Separate HSS requests are not permitted under the TFM as all HSS requests are required to be integrated into disease proposals. For this reason, HSS is not reflected as a separate component in the 2012 eligibility list applicable to the TFM.
This list should be read in conjunction with the notes that appear following the table. Please also refer to the information note on Eligibility, Counterpart Financing and Prioritization policy for more information (http://www.theglobalfund.org/documents/tfm/TFM_ECFP_InfoNote_en/). Please contact proposals@theglobalfund.org for any questions.

The eligibility list for 2012 funding channels reflects the following:
• Updated income level, disease burden and OECD-DAC list of ODA recipients : in particular, the income level data is the World Bank data as published on 1 July 2011; updated disease burden data as of December 2011 was provided by technical partners (UNAIDS and WHO);
• The grace period was rescinded by the Global Fund Board and is no longer taken into account in the 2012 eligibility list;
• G20 upper-middle income countries with less than an extreme disease burden are not eligible to apply as per the Board decision; however the "NGO rule" included in the ECFP policy still applies;
• The application of the Recent Funding rule reflects the submission deadline for TFM requests of 31 March 2012; and
• The "partial prioritization score" (based on income level and disease burden) has been updated taking into account updated income level and disease burden data.

		Eligibility criteria				General Funding Pool		Targeted Funding Pool
Country / Economy	Component	Income Category	Is the country on the OECD-DAC list of ODA recipients?	What is the disease burden of the country for each component?	Does the country have a history of recent funding?	Is the country eligible to submit a proposal in the General Funding Pool ?	Partial prioritization score (income level and disease burden)	Is the country eligible to submit a proposal in the Targeted Funding pool ?

Zimbabwe	Malaria	LI	NA	severe	**Yes**	**No***	10	**No***

The following notes refer to each column of the above table. Please read these notes carefully:

Note (1) Three components are permitted under the TFM: HIV and AIDS, tuberculosis, and malaria. Health Systems Strengthening (HSS) as a separate component is not permitted under the TFM and therefore does not appear in the 2012 eligibility list applicable to the TFM. Please refer to the TFM Information Note and Guidelines for more information about including essential HSS interventions in TFM requests.

Note (2) The Global Fund income categories are based on the World Bank (Atlas Method) Income Classifications: Low Income Countries (LI); Lower-Middle Income Countries (LMI); and Upper Middle Income Countries (UMI). Data published by the World Bank on 1 July 2011 is used for the 2012 eligibility list. The Global Fund classification further divides LMI countries into two groups, namely Lower-LMI countries and Upper-LMI countries based on the midpoint of the GNI per capita range of the World Bank's LMI category. Following the Board decision in November 2011, countries in transition between income categories are no longer given a one-year "grace period".

Note (3) This criterion applies only to UMI countries and to HIV and AIDS proposals. UMI countries not listed on the OECD DAC list of ODA recipients are ineligible to apply for funding for HIV and AIDS proposals except if the application is submitted by a non-governmental organization (NGO), and under specific conditions. This rule overrides the rule stating the G20 members that are UMI with less than an extreme disease burden are not eligible (see note 4).

Note (4) Disease burden data is provided to the Global Fund Secretariat by technical partners (WHO and UNAIDS).
The disease burden criterion applies to UMI countries in order to determine their eligibility.
• G20 members that are UMI with less than an extreme disease burden are not eligible; however the NGO rule (described in note 3) overrides this rule.
• UMI countries with "severe" or "extreme" disease burden are eligible for the General Funding Pool and the Targeted Funding Pool.
• UMI countries with a "high" disease burden can only apply to the Targeted Funding Pool.
• UMI countries with "moderate" or "low" disease burden are not eligible for either Funding Pool. There are exceptions for Small Island Economies.

Note (5) Recent Funding is defined as "the applicant has received Board-approved funding for the same component (HIV and AIDS, tuberculosis, malaria and/or Cross-cutting HSS) and has completed less than 12 months of implementation of that funding". The data included in the table above is based on history of recent funding of CCM applicants, except for Somalia and West Bank and Gaza where history of funding of non-CCM applicants is used. The data reflected in this list takes into account the deadline for submission of TFM applications set at 31 March 2012 by the Board and is based on the Secretariat's best estimates at the time of publication. Applicants are advised to check the information in this Eligibility List against the eligibility requirements as set out in the Policy (http://www.theglobalfund.org/documents/board/23/BM23_14PICPSCJEligibilityAttachment1_Policy). In the event of any inconsistency between this Eligibility List and the requirements as set out in the Policy, the Policy shall prevail. Applicants with a history of Recent Funding are ineligible to apply for the relevant component, however there are exceptions to this rule as follows: countries who requested and were granted an exemption for a specific component can submit a proposal subject to certain restrictions.

Note (6)
• An applicant is eligible to submit a proposal to the General Funding Pool for all components marked with a "yes".
• An applicant is not eligible to submit a proposal to the General Funding Pool for all components marked with a "no".
• An applicant is not eligible to submit a proposal for all components marked with a "no*" because of their history of recent funding.
• Only NGOs are eligible to submit a proposal for HIV and AIDS components marked with an "NGO only"; such proposals must meet specific conditions stipulated in the ECFP policy.
All eligible applicants must comply with additional requirements related to proposal focus and counterpart financing .

Note (7) The Board or an appropriate committee will provide guidance on prioritization if demand exceeds supply. The partial score provided in this column is composed of the income level score for the country and the disease burden score for this particular disease in this country. The minimum partial score is 3 and the maximum is 12.

Note (8)
• An applicant is eligible to submit a proposal to the General Funding Pool for all components marked with a "yes".
• An applicant is not eligible to submit a proposal to the General Funding Pool for all components marked with a "no".
• An applicant is not eligible to submit a proposal for all components marked with a "no*" because of their history of recent funding.
• Only NGOs are eligible to submit a proposal for HIV and AIDS components marked with an "NGO only"; such proposals must meet specific conditions stipulated in the ECFP policy.
All eligible applicants must comply with additional requirements related to proposal focus and counterpart financing.
