The Global Fund
To Fight AIDS, Tuberculosis and Malaria

Global Fund Eligibility List for Renewals in 2013

• This Eligibility List has been compiled by the Global Fund Secretariat to inform applicants on the eligibility of their countries to apply for funding renewal of existing grants, according to the Global Fund Board approved Eligibility, Counterpart Financing and Prioritization policy ("the Policy") and the Board decisions GF/B25/DP16 and GF/B26/DP5
• The guidance reflected in this list is for information purposes only and is based on the Secretariat's best estimates at the time of publication. Applicants are advised to
check the information provided in this Eligibility List against the eligibility requirements as set out in the Policy (http://www.theglobalfund.org/documents/board/23/BM23_14PICPSCJEligibilityAttachment1_Policy_en/) and in the Board decision GF/B25/DP16 (http://www.theglobalfund.org/documents/board/25/BM25_DecisionPoints_Report_en) In the event of any inconsistency between this Eligibility List and the requirements as set out in the Policy and Board decision, the Policy and Board decision shall prevail.

This Global Fund Eligibility list details the eligibility of individual countries for renewal of funding for existing grants in 2013. It is based on three criteria that determine country eligibility: income level (all applicants); belonging to G20 group of countries and disease burden (for G20 Upper-Middle Income countries only).

This list establishes whether each country is eligible to submit a request for continued funding for each component (HIV and AIDS, tuberculosis, malaria and HSS).

This list should be read in conjunction with the notes that appear following the table. Please also refer to the information note on Eligibility, Counterpart Financing and Prioritization policy for more information (http://www.theglobalfund.org/documents/rounds/11/R11_ECFP_InfoNote_en/). Please contact relevant Fund Portfolio Managers for any questions.

The eligibility list for 2013 funding renewal reflects the updated income level and disease burden: in particular, the income level data is the World Bank data as published on 1 July 2012; updated disease burden data as of November 2012 was provided by technical partners (UNAIDS and WHO)

G20 upper-middle income countries with less than an extreme disease burden are not eligible to submit a request for continued funding as per the Board decision

Country / Economy	Component	Income Category (as per World Bank data published 1 July 2012) *	Is the country a G-20 member?	What is the disease burden of the country for each component? **	Is the country eligible to submit a request for continued funding (grant renewal) in 2013	Required degree of proposal focus ***	Counterpart financing minimum threshold ****

The following notes refer to each column of the above table. Please read these notes carefully:

*The Global Fund income categories are based on the World Bank (Atlas Method) Income Classifications: Low Income Countries (LI); Lower-Middle Income Countries (LMI); and Upper Middle Income Countries (UMI). Data published by the World Bank on 1 July 2012 is used for the 2013 eligibility list. The Global Fund classification further divides LMI countries into two groups, namely Lower-LMI countries and Upper-LMI countries based on the midpoint of the GNI per capita range of the World Bank's LMI category.

** The disease burden gradation is as follows: low→moderate→high → severe→ extreme

*** As per the Eligibility, Counterpart Financing and Prioritization (ECFP) Policy the countries applying for renewals are expected to focus their renewal budgets to the required degree on special groups and/or interventions, based on their income level.

**** As per the Eligibility, Counterpart Financing and Prioritization (ECFP) Policy the countries applying for renewals are expected to meet the minimum threshold for counterpart financing, based on their income level. The Global Fund expects countries applying for renewals to show increasing government contributions to the disease program and health in absolute terms each year to avoid displacement of government spending by external assistance
